

# Directly bringing in waste such as household waste

## Yokkaichi Municipal Clean Center

1736 Tarusaka-cho Yokkaichi-shi  
Tel.: 059-331-6181

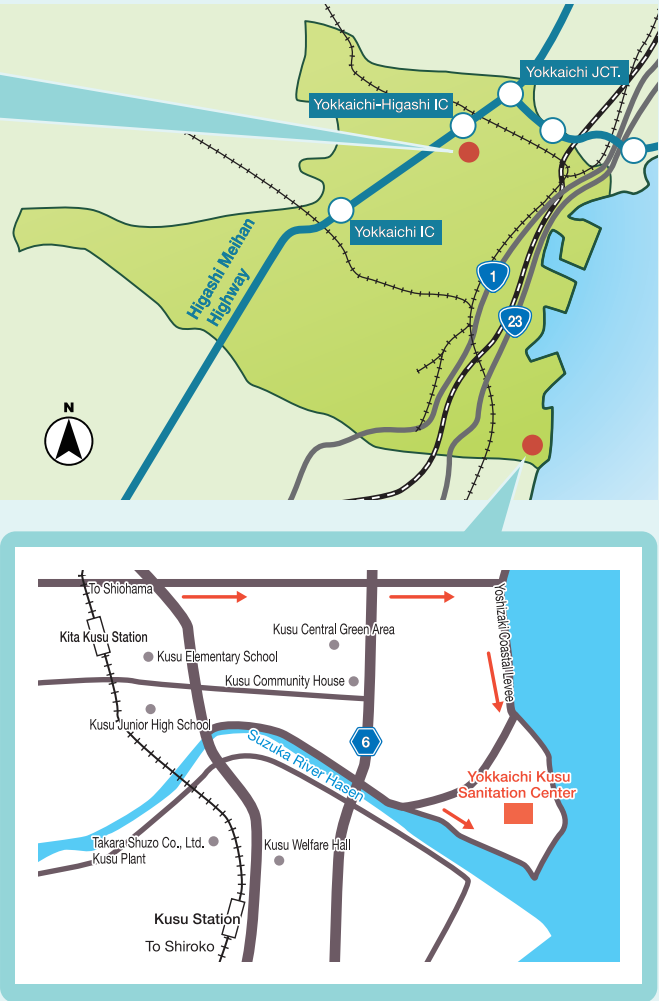

**Disposable items** Combustible garbage/Crushable garbage/  
Bulk refuse/Recyclables/PET bottles

**Reception days** Monday to Saturday (including holidays)  
\*Carry-ins by vendors are not accepted on Saturday

**Reception hours** 08:30 – 12:00  
13:00 – 16:30

**Remarks** Please see page 42 for details regarding cremation of animals.

\* Many people use this facility and it can be very crowded, so you may have to wait for a long time.  
If you bring in your waste directly to the facility, please **be sure to sort it in advance** and come well in advance.  
\* Please use this facility if a large amount of waste is created on occasion.  
\* The year-end and New Year holidays will be shown in the city bulletin and should be noted.

## Yokkaichi Kusu Sanitation Center

1085-208 Kitagomizuka, Kusu-cho Yokkaichi-shi  
Tel.: 059-397-2369

**Disposable items** Recyclables/PET bottles

**Reception days** Monday to Friday (including holidays)

**Reception hours** 08:30 – 12:00  
13:00 – 16:00

This guidebook was prepared based on the information as of April 2021.  
The way of sorting garbage may change in future. Use this leaflet in combination with the latest edition of “Garbage Collection Schedule”.

## ~How to Dispose of Garbage and Recyclables~

# Let's practice "COOL CHOICE (wise choices)" together!

Climate change caused by global warming has become a major social problem in recent years, and countermeasures are sought in various countries around the world. Let's keep in mind that "COOL CHOICE" for each of us, and let's work on global warming countermeasures that we can do in our daily lives. Reducing garbage is one of the countermeasures we have against global warming.

Let's choose now for the future.

## What is

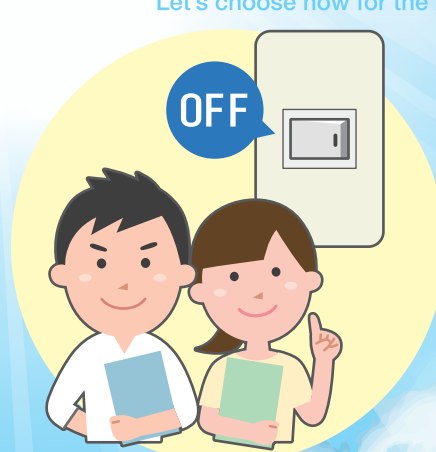

This is a national movement with items such as Japan's national greenhouse gas

## "COOL CHOICE (wise choices)"?

that encourages all "wise choices" that contribute to global warming countermeasures world-class energy-savings and low-carbon "products", "services" and "actions" to achieve reduction targets.

Choose to eat without wasting food

Choose to participate in the Cool Biz, Warm Biz and Light Down programs

Choose energy-saving home appliances, eco-houses and eco-cars

Choose to utilize flea markets and flea market apps

Choose to use public transportation

Choose to carry a reusable bag or your own bottle

Do you know about this?

## Food Loss

Food loss is food that can still be eaten but thrown away. It is said that the total annual amount of food loss in Japan is about 6.12 million tons<sup>\*1</sup>.

Let's try to "Don't buy too much", "Eat everything" and eliminate food loss.

<sup>\*1</sup> Ministry of Environment: Food loss Portal site <http://www.env.go.jp/recycle/foodloss/general.html>

## The keywords for waste reduction are the 3 Rs

First,

## Reduce

Don't make garbage

Be aware of when you dispose items from when you shop

Use refillable products to reduce wasted containers and packages

Next,

## Reuse

Used repeatedly

Think about what you can use again before throwing it away

If an item breaks, repair it and use it for a long time  
Take advantage of thrift shops and flea markets

Finally,

## Recycle

Use the items as resources again

If you use items carefully until the end of their life, sort them properly and turn them into resources

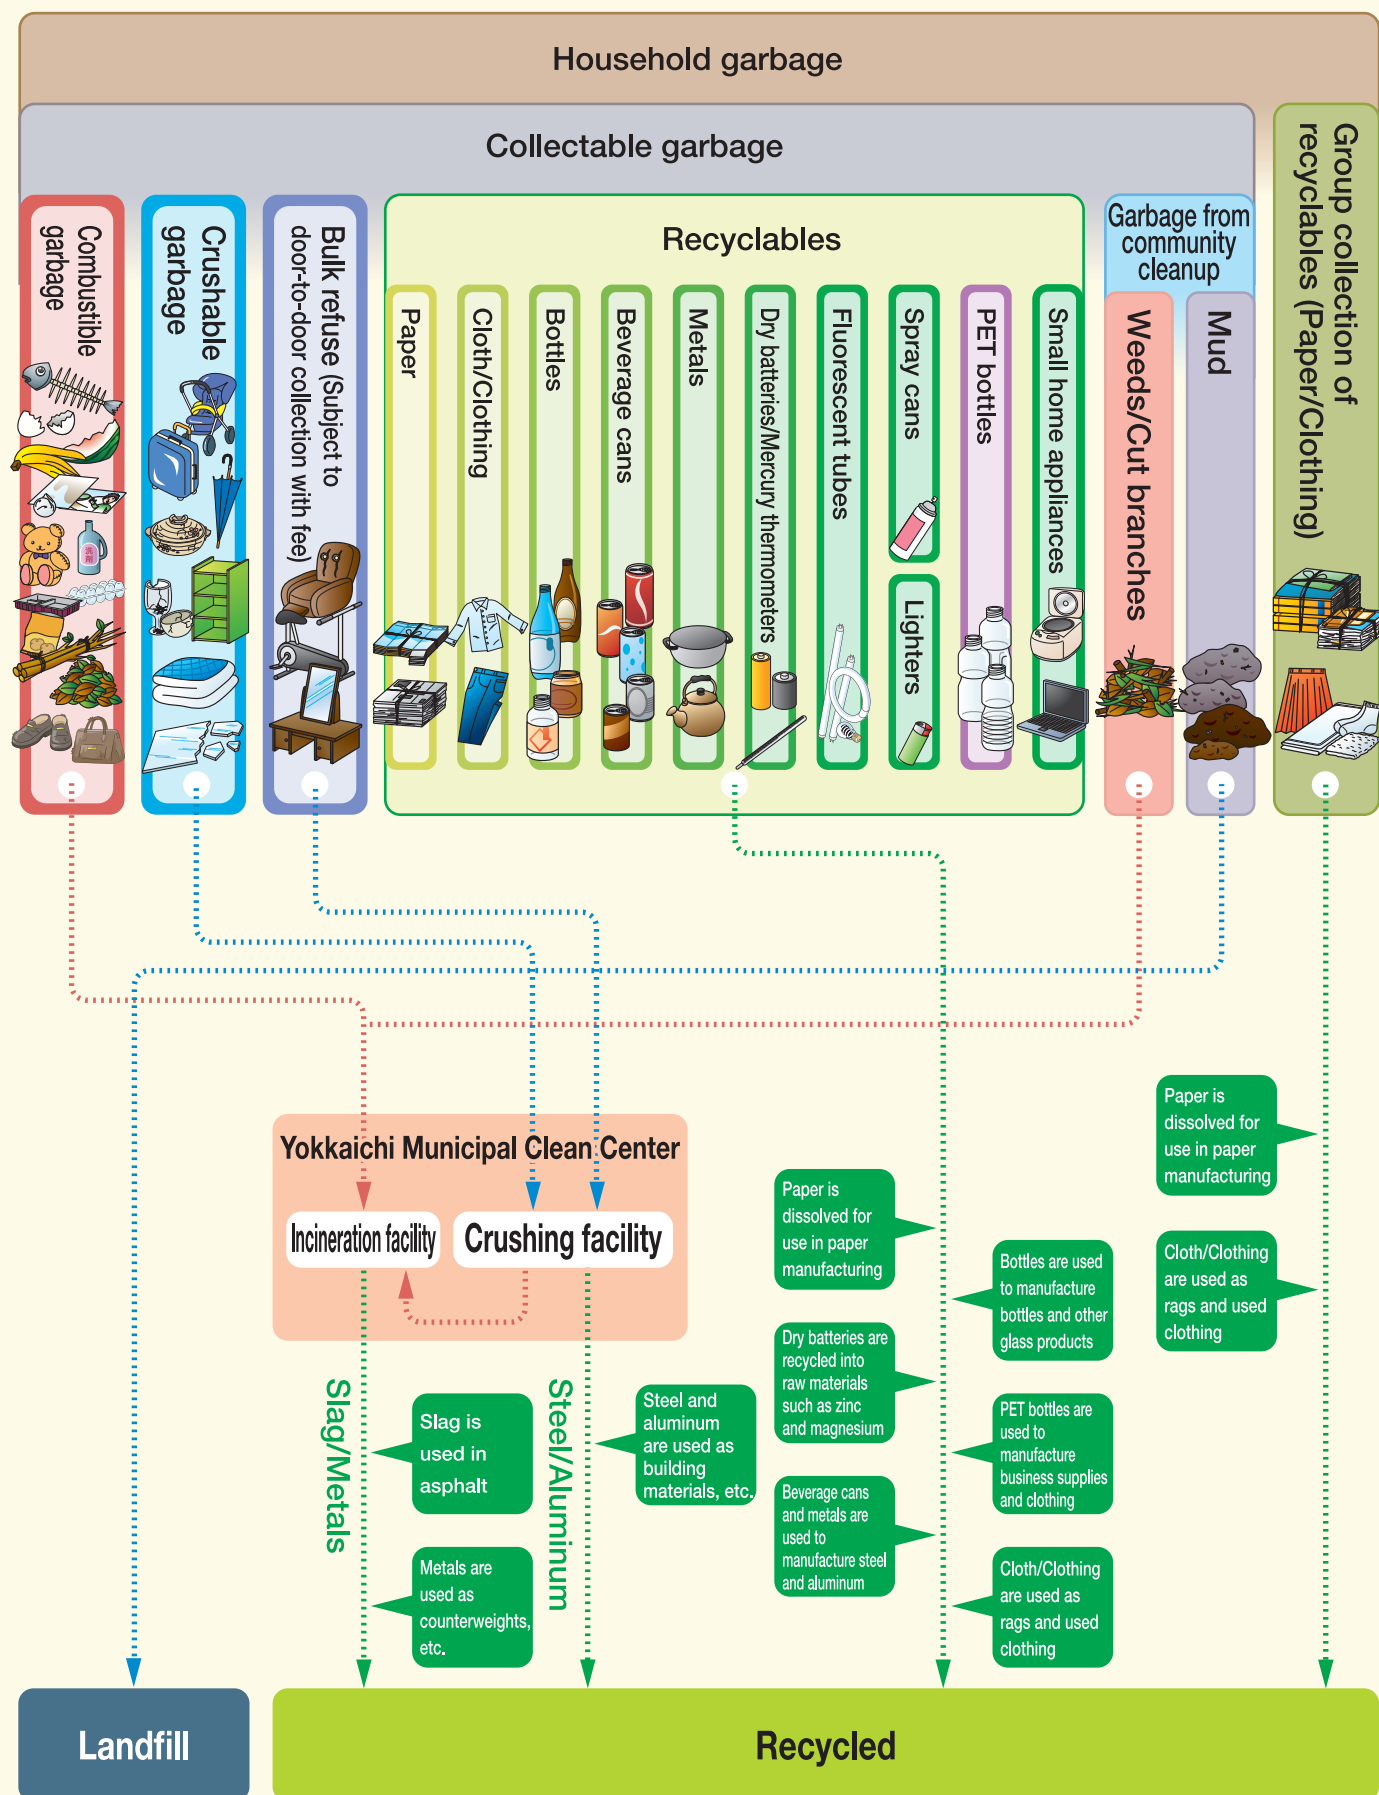

Let's use the collection box in stores and actively purchase recycled products

©Disposal and recycling of waste requires enormous energy and cost

First of all, it is important to reduce the amount of garbage

# Disposal process for Garbage/Recyclables

# Precautions for garbage disposal

Your cooperation is needed!

## Observe three rules for garbage disposal!

- By **8:30 a.m.** on the decided day
- What was decided
- To the decided collection site

For the collection days, refer to "Garbage Collection Schedule".  
Be sure to confirm your local collection site and take your garbage to the designated site.

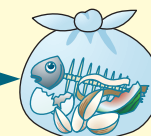

Sticker to be affixed to violating garbage

## To keep the collection site clean

Raw garbage

Drain off the water sufficiently.

Tie up the opening

Cans/Bottles/  
Plastic containers/  
PET bottles

Roughly wash with water

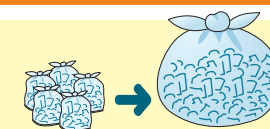

## Allow raw garbage to dry out!

If the garbage is heavily wet, strong-smelling or left not on the designated day, it may cause contamination to the collection site and lead to the trouble with the neighbors, etc.

## Garbage bags to be used

### Combustible garbage

In general, please use **Yokkaichi city designated garbage collection bags**.  
(Put in a transparent or translucent bag for small amounts of garbage.)

To improve the collection efficiency, do not divide large quantity of waste into many plastic shopping bags or use extremely small plastic shopping bags.

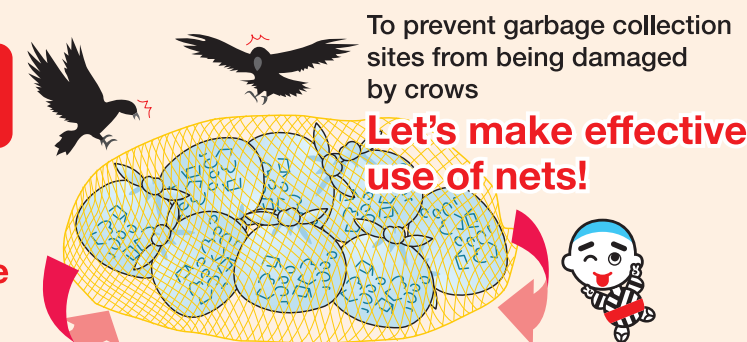

### Crushable garbage/Recyclables

Put in a transparent or translucent bag. Put in a **Yokkaichi City designated garbage collection bags**.

**\* Please do not use items other than Yokkaichi city designated garbage collection bags.**

## Collection times

Since the time of collection may vary depending on the traffic condition, the weather or the amount of garbage, be sure to take your garbage out by 8:30 a.m. It should be noted that any garbage left that violates of these rules cannot be collected.

The effective use of the net is when you touch its edges under the garbage.

# Combustible garbage

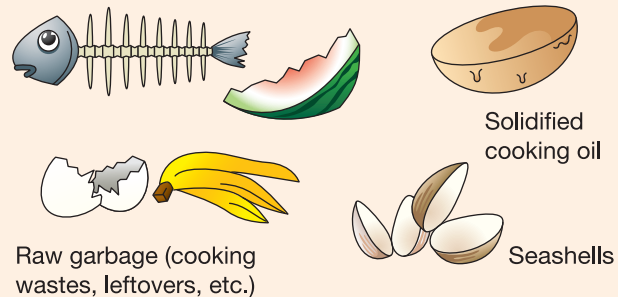

**Collection day** Twice a week  
(Monday and Thursday, or Tuesday and Friday)

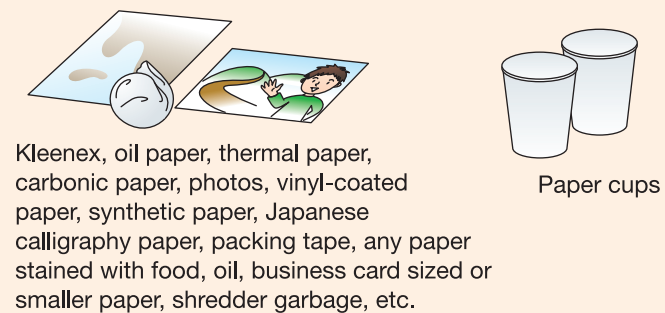

**Disposal** Put in a Yokkaichi City designated  
garbage collection bags.

## Items that can be put out

### Raw garbage from kitchen

### Unrecyclable waste paper

### Plastics

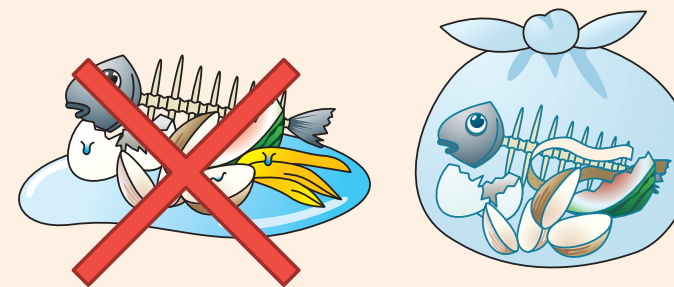

### Others

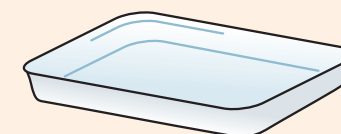

## How to dispose of Combustible garbage

### Raw garbage

● **Drain the garbage thoroughly, squeeze the mouth of the bag and let it dry out.**

### Plastics

Food trays

Plastic container that contained oil

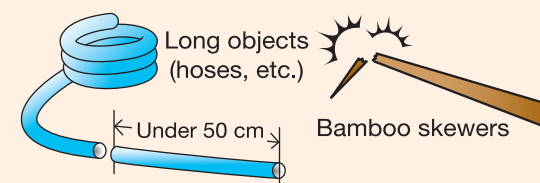

Containers for shampoo/ mayonnaise, etc.

● **Utilize the collection box placed in a supermarket or the like as much as possible.**

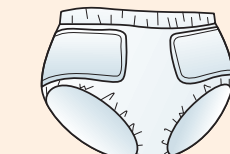

● **You cannot collect the contents.**

### Others

● **Cut into lengths of 50 cm or less.**

● **Break the tips so that they do not protrude from the bag.**

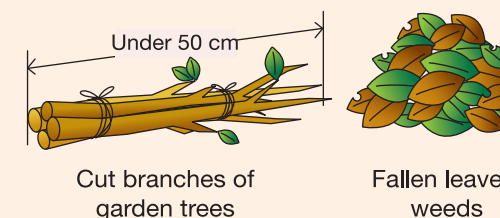

Paper diapers and sanitary napkins

● **Please flush sewage down the toilet.**

Infectious disease prevention measures

● **For items such as masks, tissues and gloves, firmly tie the mouth of the bag and remove the air inside.**

Cut branches of garden trees

Fallen leaves, weeds

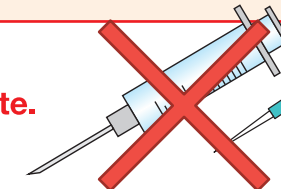

● **Cut branches of garden trees should be under 5cm thick and under 50cm of length. (Put it into a garbage collection bag designated by Yokkaichi City, or tie it up so that it can be held with one hand.)**

● **Please take care not to get injured by plants with thorns.**

### Items that cannot be put out

**Medical waste with needles cannot be put out at a collection site.**

Be sure to return sharp things to a medical institution or a healthcare provider.  
For more information, please go to page 21 regarding disposal of medical waste.

### Attention

**Please put out garden trees, weeds and fallen leaves in the latter half of the week.**

The total amount of garbage collected during Monday/Tuesday is larger than the amount collected during Thursday/Friday, because the waste from the 4 days are being disposed during Monday/Tuesday. From the viewpoint of hygiene, perishable raw garbage is prioritized, and it is therefore requested that cut branches, leaves, weeds, etc. be disposed in the latter half of the week (Thursday or Friday) when the total amount of the garbage is smaller. (As a guideline for the amount to be put out at one time, please hold it with one hand [about 2 bags])

# Crushable garbage

**Collection day** Once every two weeks

**Disposal** Put in a transparent or translucent bag.

## Items that can be put out

### Bulk refuse

Suitcases

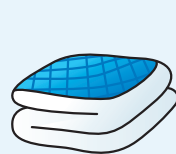

Umbrellas

Strollers

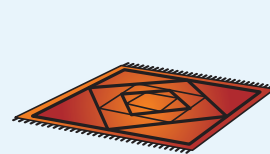

Cooler boxes

Futons

Child seats

Rugs

Cart for aged people

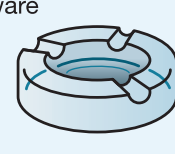

### Glass/Ceramics

Ceramic/Glass tableware

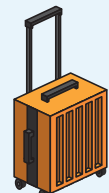

Cosmetic bottles

Glass furnishings such as ashtrays and aquariums

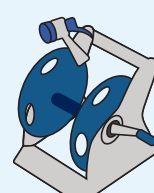

### Others

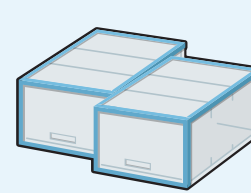

Carry cases

Poly tanks

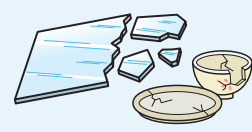

Hose reels

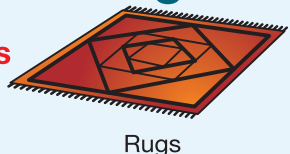

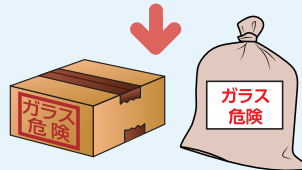

Plastic clothes storage box

## How to dispose of Crushable garbage

● Put broken glass or ceramics in a box or a bag and label it as “ガラス危険” (Glass, Danger).

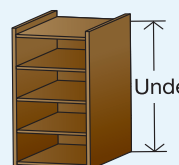

Rugs

● Please make these a length of 1 m or less.

Cut branches of garden trees

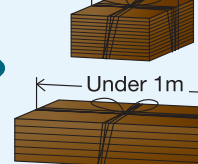

● When disposing of crushable garbage, keep it 1m or less and less than 20 cm thick.

Break down such item to pieces shorter than 1 m and bundle them to be collected at the collection site.

Under 50 cm

Under 1m

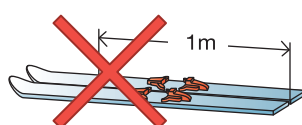

➡ Please dispose of items less than 50 cm as combustible garbage.

➡ Please dispose of items from 50 cm to 1 m wide as crushable garbage.

### Items that cannot be put out

Anything longer than 1 m cannot be left at the collection site in its original state.

Ski boards, etc.

Tables, desks

Beds

Bring such items to the Yokkaichi Municipal Clean Center or use the pay-for door-to-door collection for bulk refuse (in page 19).

# Flow of disposal of Combustible garbage/Crushable garbage

## Crushable garbage

It gets crushed into little pieces!

## Magnetic sorting

Other (plastic, wood scrap, etc.)

To incineration facility

Iron/steel

Aluminum

Recycled

## Combustible garbage

Garbage arriving at the processing facility is heated and melted to reduce it to slag/metals. The slag and metal from the melting furnace are recycled as resources. Compared with the conventional handling method, the amount of the final handling can be greatly reduced.

### Drying and heating stage (About 300°C to 400°C)

Garbage is dried by pyrolysis gases, causing any moisture to evaporate.

### Pyrolysis and gasification stage (300°C to 1000°C)

Garbage is heated in the absence of oxygen, causing organic matter in the garbage to turn into combustible gases.

### Combustion stage (1000°C to 1700°C)

The remaining combustible residual matter that did not turn into gas burns.

### Melting stage (1700°C to 1800°C)

Incombustible material left over after gasification melts at high temperatures.

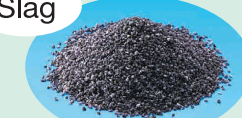

The waste heat generated during garbage disposal is used to generate electricity. That electricity generated is used by the Yokkaichi Municipal Clean Center, and any remaining electricity is sold to power companies. (Electricity consumption of up to 9000 households)

Pyrolysis gases

Melted material Slag/ Metals

## Recycling of melted material

Slag

Asphalt for paving roads

Metals

Counterweights, etc.

# Paper - Recyclables -

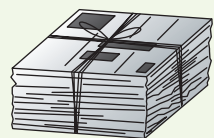

**Collection day** Once every two weeks

**Disposal** Tie them in a cross and take them out.

## Items that can be put out

### Used paper

Newspapers/Inserts

Milk cartons

Corrugated cardboard

Magazines/  
Miscellaneous paper

## How to dispose of Paper

- Spread them out flat, and tie them together with a string in a cross shape.
- Divide the garbage into newspapers/inserts, paper packs (milk cartons, etc.), corrugated cardboard and magazines/miscellaneous paper.
- Spread out the paper containers of sweets flat and put them out as miscellaneous paper.

### Items that cannot be put out The following types of paper cannot be collected as recyclables.

Kleenex, oil paper, thermal paper, carbonic paper, photos, vinyl-coated paper, synthetic paper, packing tape, paper pack with silver color inside, any paper stained with food, oil, etc. are difficult to recycle, and must be collected as combustible garbage.

### Attention

**When you put out the garbage at a collection site, please sort it by type correctly.**

Each category of paper (used paper) is recycled to make different types of paper.

#### Newspapers/Inserts

Newspapers, weekly magazines, printing paper, etc.

#### Milk cartons

Toilet paper, Kleenex, etc.

#### Corrugated cardboard

Corrugated cardboard cases, paper tubes, etc.

#### Magazines/Miscellaneous paper

Paper boxes, picture books, etc.

### Please tie up the garbage with a string.

Paper is transported to paper mills through various mechanical processes for each type of paper. Items that are tied up in bags or tape must be removed manually, which reduces the efficiency of work and recycling rate.

\* Please also use places such as the over-the-counter collection point at supermarkets according to your lifestyle.

\* Yokkaichi City supports the collective recycling of resources. Your cooperation is needed. Please see page 22 for details.

# Cloth/Clothing - Recyclables -

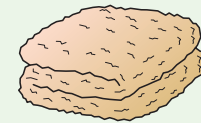

**Collection day** Once every two weeks

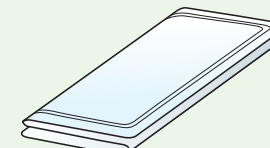

**Disposal** Put in a transparent or translucent bag.

## Items that can be put out

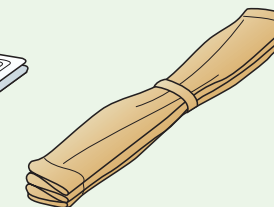

### Cloth

Blankets

Bed sheets

Curtains (including lace curtains)

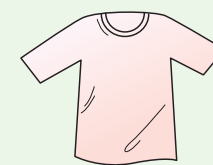

Towels

Wrapping cloth

### Clothes (Clothes are mostly reused regardless of the fabric material)

Under wears

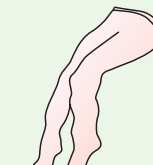

Dress shirts

Sweaters

Business suits

Stockings

Leather jackets

Down jackets

Skirts

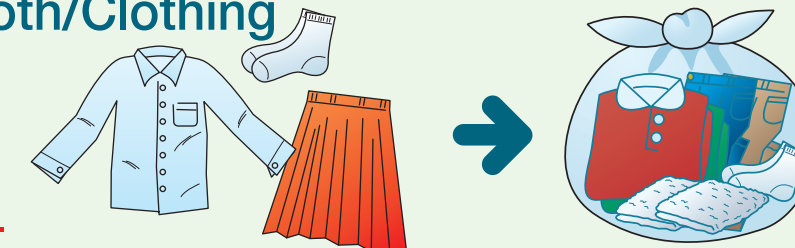

Trousers

Socks

## How to dispose of Cloth/Clothing

- Wash your clothes and then take them out.
- Gather and then put in a transparent or translucent bag.

### Items that cannot be put out

Please dispose of items such as carpets, futons and mattresses as crushable garbage.

### Attention

**Don't take them to the collection site on rainy days.**

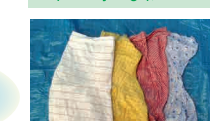

Wet cloth cannot be recycled because it may cause odor, mold, etc.

### Sorted

Carried overseas for reuse

Cut into square pieces and used as waste cloth (factory rags), etc.

Recycled into recovered materials (such as felt and cushioning)

Many of the collected clothing are reused and worn in foreign countries, etc. Wash the clothing before collection and leave the attached buttons and zippers as much as possible. Even torn, unwearable clothing can be used as waste cloth (factory rags).

# Bottles - Recyclables -

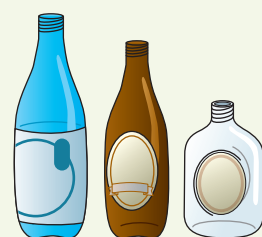

**Collection day** Once every two weeks

**Disposal** Put in a transparent or translucent bag.

## Items that can be put out

Bottles for food and beverage (including drink-type medicine)

Liquor bottles

Beverage bottles

Seasoning bottles  
(bottles for salt,  
pepper, sesame oil, etc.)

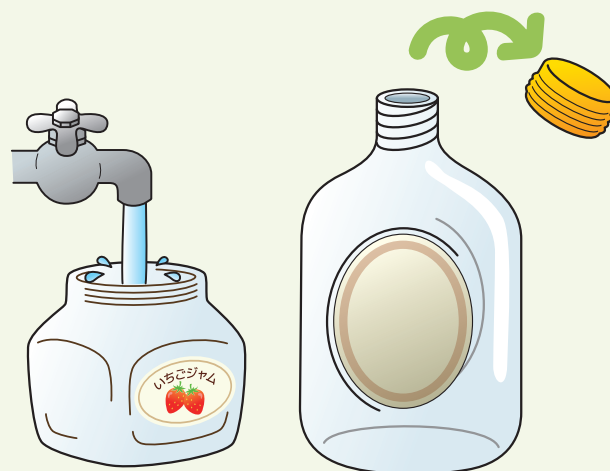

Soluble coffee  
bottles

Bottles such as  
for umeboshi

## How to dispose of Bottles

- It is not necessary to remove labels.
- Remove the cap and sort according to the material.
- Empty the content and roughly wash with water.

## Items that cannot be put out

Since this is material that is difficult to recycle, please dispose of it as crushable garbage.

Ashtrays, vases  
or other glass  
furnishings

Cosmetic  
bottles

Glass tumblers  
and other glass  
tableware

Ceramics

**You cannot collect items with the contents.**

## Please dispose broken bottles as crushable garbage.

Put broken pieces in a box and dispose of them as crushable garbage because broken bottles are dangerous and the material they are made from is uncertain.

Dispose of them as  
crushable garbage

Put it in a sandbag  
and put it in  
crushable garbage

# Beverage cans - Recyclables -

**Collection day** Once every two weeks

**Disposal** Put in a transparent or translucent bag.

## Items that can be put out

Cans for beer, coffee, soft drink and other beverages

Steel and aluminum cans

## How to dispose of Beverage cans

- Empty the content and roughly wash with water.

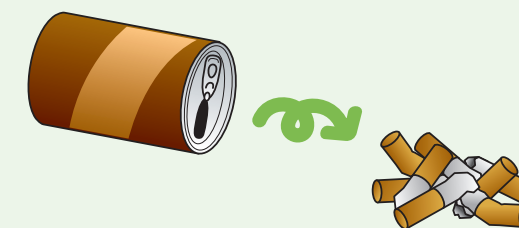

- Remove the cap and put it out with the metal.

- It is not necessary to separate steel and aluminum cans. Do not crush it before collection.

- Be sure to remove any foreign matter, such as cigarette butts, from cans. Inclusion of any foreign matter will make the recycling difficult.

## Attention

**Do not crush steel/aluminum cans before collection.**

Collected beverage cans are automatically sorted into aluminum and steel cans and then compressed by a press machine. If crushed cans are included, they may be caught on the sorting line and thereby hinder smooth sorting, and in the press process, they may interfere with compact engagement of cans and then cause failure in compression.

Automatic sorter  
Steel and aluminum cans  
are sorted by magnetic force

Pressed block  
Cans are compressed  
for easy carrying

# Metals - Recyclables -

**Collection day** Once every two weeks  
**Disposal** Put in a transparent or translucent bag.

## Items that can be put out Collect the items even if the metal is rusted

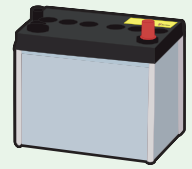

Caps of beverage cans/bottles

Food cans, confectionery cans, powder milk cans (wash the inside)

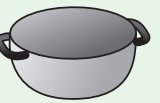

Electric cords, extension cords

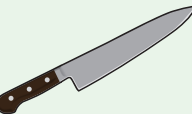

Car batteries

Frying pans

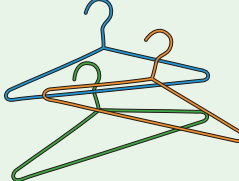

Pans

Knives

Scissors

Wire hangers

Gardening props

Oil heaters

Gas burners

Bicycles (collectable even if larger than 1 m)  
\* Bring into the collection site or mark like “処分するもの” (Disposal).

## How to dispose of Metals

●Put items like needles and razor blades, etc. in a metal container and cover it.

●Gather small items such as canned cans, beverage can caps and bottle caps together in a bag.

●For kitchen knives and scissors, wrap the blade in a material such as thick paper or cardboard and label “刃物危険” (Danger! Blade).

●Be sure to remove kerosene and batteries from oil heaters.

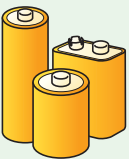

**Attention** Be sure to observe the rules of handling metals, otherwise it may cause injury or fire.

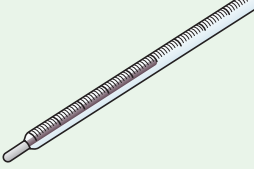

# Dry batteries/Mercury thermometers - Recyclables -

**Collection day** Once every two weeks  
**Disposal** Put in a transparent or translucent bag.

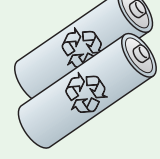

## Items that can be put out

Dry batteries

Mercury thermometers

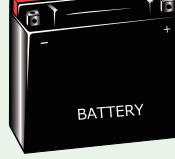

Rechargeable batteries

Button batteries

Lithium-ion batteries

Motorcycle batteries

Power-assisted bicycle batteries

## How to dispose of Dry batteries/Mercury thermometers

- Note “電池” (Batteries) on the bag.
- Note “水銀体温計” (Mercury thermometers) on the bag.  
(Please take out mercury thermometers so they do not break)
- Button batteries may generate heat, so stick vinyl tape on both sides of the batteries and take them out.

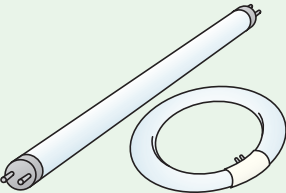

**Attention** Never put waste containing mercury (mercury thermometers/mercury sphygmomanometers) in combustible or crushable garbage. If mercury gets into the incineration facility, it will not operate normally. If possible, ask the store where you purchased the rechargeable batteries to pick them up. Batteries/Mercury thermometers are not collected at the District Civic Center.

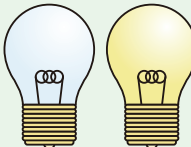

# Fluorescent tubes - Recyclables -

**Collection day** Once every two weeks  
**Disposal** Put in a transparent or translucent bag.

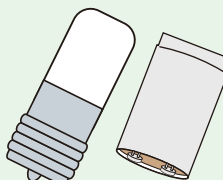

## Items that can be put out

Fluorescent tubes (Including LED)

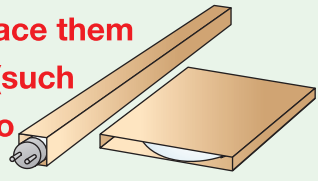

Light bulbs (Including LED)

Glow lamps

## How to dispose of Fluorescent tubes

- Note “蛍光管” (Fluorescent tubes) on the bag.
- Wrap bulbs in paper or place them inside a protective cover (such as the box they came in) to keep them from breaking.

**Attention** Do not use tape for damage prevention.

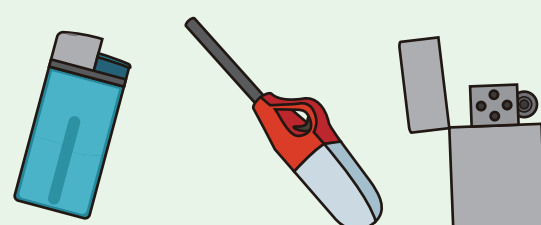

# Spray cans/Lighters - Recyclables -

**Collection day** Once every two weeks  
**Disposal** Put in a transparent or translucent bag.

## Items that can be put out

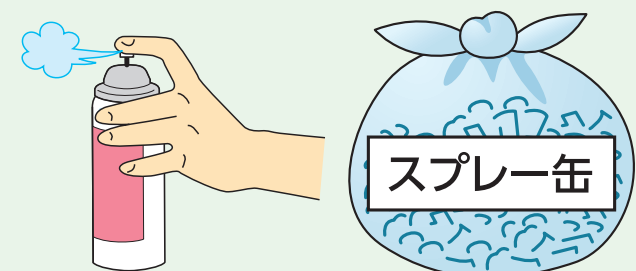

Spray cans

Lighters

## How to dispose of Spray cans/Lighters

- Please put spray cans in bags labeled with “スプレー缶” (Spray cans). (Do not mix with other recyclables)
- Empty the spray can first. You don't have to puncture the can.

- Please put lighters in bags labeled with “ライター” (Lighters). (Do not mix with other recyclables)
- Empty the lighter first.

### Attention Please put these out on recyclables collection dates.

Unsorted spray cans and lighters are thrown away as combustible garbage and crushable garbage, which may cause fires. There have also been fire accidents in Yokkaichi City that burned down packaging trucks. In addition, never mix spray cans and lighters with other recyclables.

A spray can that ruptured and caught fire inside a garbage truck

# PET bottles

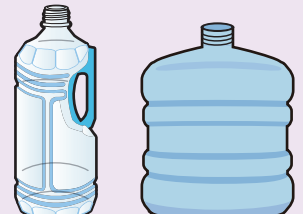

**Collection day** Once every two weeks  
\* Put out PET bottles on designated collection days only.  
**Disposal** Put in a transparent or translucent bag.  
\* If a designated collection container is available, use that.

## Items that can be put out

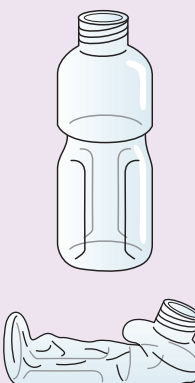

Containers that held liquids such as carbonated beverages, fruit juice, oolong tea, Japanese tea, barley tea, coffee, black tea, sports drinks, mineral water, shochu, mirin, liquor, sake, or soy sauce

Only PET bottles marked with the PET material symbol on the label or at the bottom are collectible

## How to dispose of PET bottles

- Empty the content and roughly wash with water. (Labels/Caps are collected as combustible garbage.)
- Remove any items that can be removed, such as inner plugs or rings on the mouths of items.
- Please crush them as much as possible.

- At the collection site equipped with collection containers, please put in only the PET bottle.

- At the collection site not equipped with collection containers, put it in a transparent or translucent bag.

### Items that cannot be put out The items shown below will not be collected.

Bottles such as these cannot be recycled, for example because they are difficult to clean or because they are made from more than one type of material. All such items must be left in the garbage collection site on designated “combustible garbage” collection dates.

Items such as PET bottle caps, labels	Oil-tainted PET bottles	Non-food PET bottles	PET products other than bottles
Containers for basting, sauce, dressing, cooking oil, etc.		Containers for detergent, shampoo, hair conditioner, etc.	Egg packages, stationery, etc.

**Attention** Please also use collection boxes installed in stores since they can be used at night and on Saturdays and Sundays.

# Small home appliances - Recyclables -

**Collection day** Once every two weeks  
**Disposal** Put in a transparent or translucent bag.  
\* If a designated collection container is available, use that.

## Items that can be put out \* If an item has an electric cord, it will be collected as a small home appliance.

## How to dispose of Small home appliance

- Be sure to remove kerosene from fan heaters.
- Batteries used in small home appliances such as lithium batteries can cause a fire, so please remove them as much as possible.
- It is your responsibility to delete personal information and data contained in your desktop computers or mobile phones.
- Please tie up electric carpets with string in a cross shape and discard it.
- Please see Page 22 for How to dispose of computers.

**Items that cannot be put out** Washing machines, televisions, air conditioners, refrigerators and other home appliances cannot be treated as small home appliance. Please dispose of these items using the home appliance recycling program. →See page 18.

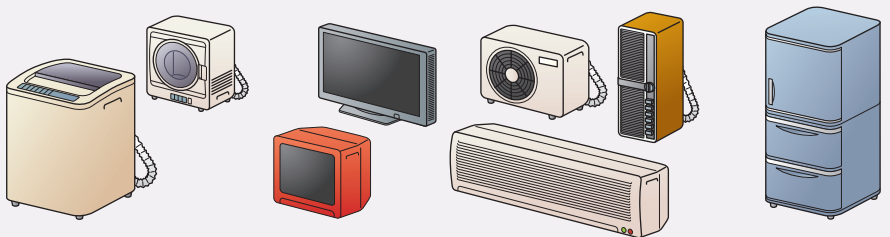

Garbage neither collected nor disposed of by the city

# Items subject to Home Appliance Recycling Law

The following four items are collected by the manufacturers or the like for recycling in accordance with "the Home Appliance Recycling Law".

## Home appliances subject to this system and the recycling charges

Washing machine Clothes drier	Television (picture tube type) LCD and plasma televisions	Air conditioner	Refrigerators (including wine cellars, etc.) Freezer (including home freezers, etc.)
2,530 yen	15V or smaller: 1,870 yen 16V or larger: 2,970 yen	990 yen	170ℓ or smaller: 3,740 yen 171ℓ or larger: 4,730 yen

These are the recycling charges published by major manufacturers as of April 2021.

The recycling charge may vary depending on the manufacturer and therefore should be confirmed with the appliance store or the Association for Electric Home Appliances (Home Appliance Recycle Ticket Center).

**Electric Home Appliances Recycle Ticket Center**  
0120- 319640  
Reception hours: 09:00 - 18:00 (except Sundays and holidays)  
Website: <http://www.rkc.aeha.or.jp>

## Processing method

**Method 1** To request the appliance store to accept the item  
Request the store where you bought it or will buy new one to accept the item by paying the recycling charge and the collection and transportation charge.

**Method 2** To bring the item directly to the designated acceptance site in the city  
Check the manufacturer and buy the recycling ticket at the post office in advance. →Bring the item to the designated acceptance site.

**Guide map for designated acceptance sites**

**NIPPON EXPRESS CO., LTD.** Mie Branch Yokkaichi Logistics Center Office  
3-7-11, Shinsho Tel.: 059-352-4155

**ASAHI METAL Co., LTD.** Yokkaichi Plant  
16-11 Shoen-cho Tel.: 059-351-4606

Please check here for business days and times of the designated collection locations.

**NIPPON EXPRESS CO., LTD.**  
<https://www.e-map.ne.jp/p/rkcsymap/dtl/299/?&his=sa1>

**ASAHI METAL Co., LTD.**  
<https://www.e-map.ne.jp/p/rkcsymap/dtl/298/?&his=sa1>

**Method 3** To request a general industrial waste collection and transportation dealer to bring the item  
After confirming the manufacturer and product number in advance, go to the post office to pay the charge. →Request a general industrial waste collection and transportation dealer to bring the item to the designated acceptance site. (You have to pay the collection and transportation charge.)

# Pay-for door-to-door collection for bulk refuse

Bulk refuse specified items cannot be left at the garbage collection site.

List of bulk refuse specified items that will be collected for a fee  
(These items are collected at your door by telephone request)

\* Bulk refuse specified items can be dropped off the Yokkaichi Municipal Clean Center (Yokkaichi Clean Center).  
\* The collection fee is 1,100 yen per item (including tax). (As of April 2021)

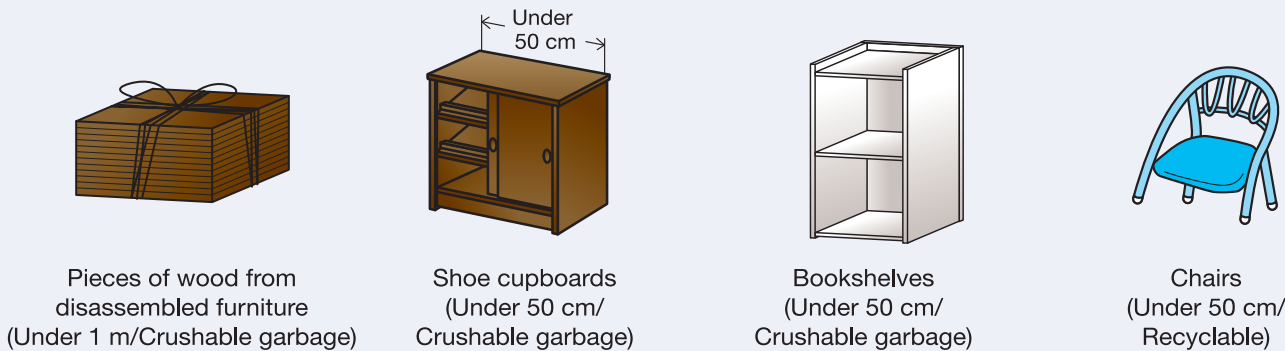

The door-to-door collection system is applicable to items other than those specified as bulk refuse if desired

## Example of collectable items

\* Any item not on the list of bulk refuse specified items which is shorter than 1 m is collectable at the collection site. However, such items are also covered by the pay-for door-to-door collection system if you request (except some items that are difficult to collect).

Some of the bulk refuse specified items can be take to the garbage collection site

\* Among the items designated as large-scale garbage, objects with a maximum length of no more than 50cm or small bookshelves can be discarded as crushable garbage in the garbage collection site after being disassembled and cut into small pieces.

# Telephone application is needed

## Procedure for using pay-for door-to-door collection for bulk refuse

Before applying

\* Please measure the size (cm) of the item to be disposed of.  
\* Please have a notepad ready.

1 Request the collection by calling the Yokkaichi Municipal Bulk Refuse Reception Center (Yokkaichi-shi Sodai Gomi Uketsuke Center).

Reception telephone number

Tel.: 059-353-4894

Reception hours:  
08:30 – 17:00  
(Except Saturdays, Sundays and holidays)

2 Tell us your address, name, telephone number, type and number of items.

Up to 10 items can be accepted per request. If you have 11 or more items, request the collection again.

3 The Yokkaichi Municipal Bulk Refuse Reception Center tells you the date of collection and reception number.

Be sure to write them down.

4 Write your name or the reception number on the bulk refuse disposal ticket (sticker) and affix it to the item to be disposed of.

Purchase the bulk refuse disposal ticket at city-designated stores.  
(For a list of dealers of bulk refuse disposal tickets, please see the garbage collection schedule [back side].  
Or you can search from the Yokkaichi city website.)

Keyword search 粗大ごみ処理券取扱店一覧 Search

5 Put the item in the designated place by 8:30 a.m. on the collection day.

- This cannot be collected inside the house.
- You do not have to be present at the time of collection. Put the item in the place which will not annoy other people or block traffic.
- Put the item beside the doorway or gate.
- In case of a house located at the end of a narrow alley or the like, put the item in the place determined at the time of reception.
- Please note that you cannot specify the collection time.

If you have difficulty in hearing or speaking, please contact the Life Environment Section. Fax: 059-331-6183

MEMO

.....

# Difficult to handle items

Following items can not be taken to the garbage collection site. Please bring them directly to the disposal facility

(Anything longer than 1 m cannot be left at the collection site in its original state)

- Fireproof Safes
- Electones
- Handcarts
- Organs

Garbage neither collected nor disposed of by the city **Business waste cannot be left at the garbage collection site**

Following items cannot be left at the garbage collection site.  
These cannot be brought to the processing facility.

- Motorized bicycles
- Motorcycle
- Oils (Kerosene, gasoline, oils)
- Agricultural Chemicals/
- Other toxic items
- Tires
- Propane gas cylinders
- Fire extinguishers
- Syringes/Injection needles
- Paint etc.
- Items subject to Home Appliance Recycling Law

## Main processing methods

### ● Tires

⇒ Please contact places such as where the item was replaced or stores.

### ● Propane gas cylinders

⇒ Ask a dealer or specialist to pick the items up.

### ● Fire extinguishers

⇒ If purchasing a new item, please ask the store to recycle the old one.

For aerosol types, use up all the contents and put them out as recyclables (spray cans).

If you want to dispose of items yourself, ask a specific recycling window.

When requesting collection by Yu-Pack, please contact the call center in advance.

### ● Items subject to Home Appliance Recycling Law

⇒ See page 18.

Toll-free number for Yu-Pack

☎ 0120-822-306

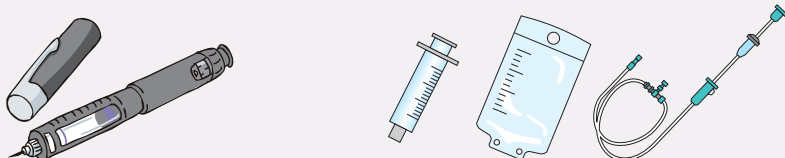

For details, go to the Fire Extinguisher Recycling Promotion Center  
<https://www.ferpc.jp/disposal/help>

## Disposal of medical waste

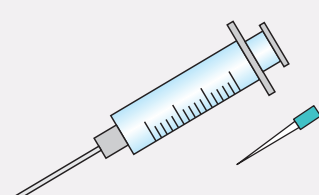

For sanitary reasons, packages, tubes, and other items used for medical purposes should always be treated as combustible waste, with the exception that sharps (items with needles) cannot be left in collection site. Be sure to return sharp things to a medical institution or a healthcare provider.

### Treat as combustible garbage

(Please put this in an item like a transparent container.)

### Return to healthcare provider

# Others

## Illegal waste dumping is a crime

Improper garbage disposal is considered as illegal dumping and constitutes an environmental crime.

Land owners (managers) are obliged by law to maintain the cleanliness of their land.

The owners (managers) are requested to make efforts in the proper maintenance and management of their land by taking measures against illegal dumping using notice boards, fences, etc., by mowing weeds, or by other means to cooperate in establishing the environment which prevents and does not cause illegal dumping. Improper waste disposal may carry a term of imprisonment up to 5 years or a fine up to 10 million yen or these penalties will be imposed.

If you find any illegal dumping, please contact the Life Environment Section (Seikatsu Kankyo-ka).

## Open-air burning is prohibited by law

Open-air burning or waste incineration using non-conforming incinerators is prohibited. Illegal open-air burning activities may carry a term of imprisonment up to 5 years or a fine up to 10 million yen or these penalties will be imposed.

resultant smoke, odor, ash, etc. may cause trouble. Don't burn any waste by households. Sort waste and take them to the garbage collection site.

The following types of open-air burning are allowed by law as exceptions.  
However, use great caution not to annoy the neighbors

- Fire prevention drill
- Incineration of "sacred straw festoons, decorative pine trees," etc. used in Japanese customs or in religious rites
- Field burning, burning of weeds on the furrow or bottom weeds and other activities unavoidable to carry on agriculture/forestry/fisheries
- Incineration of waste wood pieces in a open fire, campfire, etc. (provided that it is on a minor scale which does not disturb the living environment)

## Taking away recyclables is an ordinance violation

**Personal Safety First - some of the people who take garbage away can be very dangerous -**

There are city patrols conducted in collaboration with the police and private security firms, but people who take recyclables away are becoming more malicious. If you see intimidating attitudes, violent driving or a violation of traffic regulations, please contact the police.

**Your cooperation is needed - please provide information -**

When you see someone taking these items away, please send information such as the date and time, place, car number, items taken away and characteristics of the people involved to the Life Environment Division. We ask for your cooperation as much as possible, putting your safety first.

### The city aids group collection of recyclables

The city offers subsidies to registered citizen groups which voluntarily collect recyclables. This system is applicable to the collection of used paper and cloth, and 5 yen is paid per kilogram of the quantity received by a collection agent.

### How to dispose of computers Please use Computer 3Rs Promotion Center.

The following website provides contact information for various manufacturers and a schedule of recycling fees.

<http://www.pc3r.jp>

Tel.: 03-5282-7685 Fax: 03-3233-6091

Reception hours: 09:00 - 12:00/13:00 - 17:00 (Except Saturdays, Sundays and holidays)

# List of garbage items and their categories

## Common examples of garbage are listed here.

- \* The sort category may vary depending on the size or material even for the same kind of items. For some items, unique trade names are listed for clear understanding.
- \* Garbage items with a note “Those of more than 1 m in length cannot be left at the collection site in their original state.” are accepted at the designated disposal facility if they are directly brought into the facility, or collected at the garbage collection site if they are disassembled or cut into pieces shorter than 1 m.
- \* There are some items that are not specified as being subject to the pay-for door-to-door collection for bulk refuse but can be collected at your door if you request and pay the charge. For more information, contact Bulk Refuse Reception Center. (Refer to page 19 for details.)

	Item	Sort category	Remarks
A	Abacuses (made of wood)	Combustible garbage	
	Absorbent cotton	Combustible garbage	
	Accessories (made of metal)	Recyclables (metals)	Shell, bone or plastic items are combustible garbage.
	Adhesive carpet cleaners (sheet paper)	Combustible garbage	
	Adhesive plasters	Combustible garbage	
	Adhesives	Combustible garbage	
	Agricultural chemical bottles	Recyclables (bottles)	Items with contents remaining cannot be collected.
	Agricultural Chemicals	Not collected and processed by city.	Ask the store where purchased to take the product back.
	Air conditioners	Not collected and processed by city.	Items subject to Home Appliance Recycling LawFor details, refer to page 18 of the Guidebook for Garbage Disposal.
	Air conditioners (cooler)	Not collected and processed by city.	Items subject to Home Appliance Recycling LawFor details, refer to page 18 of the Guidebook for Garbage Disposal.
	Air conditioners (for home use)	Not collected and processed by city.	Items subject to Home Appliance Recycling LawFor details, refer to page 18 of the Guidebook for Garbage Disposal.
	Air cushions	Combustible garbage	
	Air fresheners	Recyclables (spray cans)	Empty contents.
	Air purification machines	Recyclables (small home appliances)	
	Albums (made of adhesive paper)	Combustible garbage	
	Aluminum cans (beverage cans)	Recyclables (beverage cans)	Empty contents and rinse with water.
	Aluminum foils	Recyclables (metals)	If extremely dirty items are combustible garbage.
	Aluminum guard plates (litter control)	Recyclables (metals)	
	Aluminum sheet	Combustible garbage	
	Antennas	Recyclables (small home appliances)	Anything longer than 1 m cannot be left at the collection site in its original state. Items exchanged by vendors cannot be collected.
	Artificial flowers	Combustible garbage	
	Ash	Combustible garbage	Moisten with water.
	Ash trays (ceramic/glass)	Crushable garbage	Metal items are recyclables (metals).
	Astronomical telescopes	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Audio system racks	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Augers	Recyclables (metals)	Wrap the sharp parts in a material such as thick paper or cardboard.
	Awls	Recyclables (metals)	Wrap the sharp parts in a material such as thick paper or cardboard.
	Axes	Recyclables (metals)	Wrap the blade in a material such as thick paper or cardboard and label “刃物危険” (Danger! Blade).
B	Baby bottles (made of glass)	Crushable garbage	
	Baby bottles (made of plastic)	Combustible garbage	
	Baby carriages	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Baby gate	Crushable garbage	Metal items are recyclables (metals).

	Item	Sort category	Remarks
B	Baby wipes	Combustible garbage	
	Backpacks	Combustible garbage	
	Bags	Combustible garbage	Items more than 50 cm are crushable garbage.
	Ballpoint pens	Combustible garbage	Metal items are recyclables (metals).
	Balls (for sports)	Combustible garbage	Deflate.
	Bamboo swords	Crushable garbage	
	Bandages	Combustible garbage	
	Barbecue sets (made of metal)	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Barbells (made of metal)	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Baseball bats (made of metal)	Recyclables (metals)	Wooden and plastic items are crushable garbage.
	Basins (made of plastic)	Combustible garbage	Metal items are recyclables (metals).
	Bath mats (made of plastic)	Crushable garbage	
	Bathroom scales	Recyclables (small home appliances)	Remove batteries.
	Bathtub covers (made of plastic)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Bathtubs	Not collected by city	Take it directly to the Yokkaichi Municipal Clean Center. Items going along with vendor construction cannot be brought in.
	Batteries (for cars, motorcycles, motorized bicycle, assisted bicycles)	Recyclables (metals)	Batteries of motorcycles, motorized bicycle, and assisted bicycles are recyclables (dry batteries/mercury thermometers).
	Beach parasols (made of metal)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Bed pads	Crushable garbage	
	Bed sheets	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage.
	Beds	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Beer bottles	Recyclables (bottles)	If possible, return to store where purchased.
	Belts	Combustible garbage	
	Beverage cartons (for milk/soft drink)	Recyclables (papers)	Flatten and tie it crosswise with a string. Items with silver inside are combustible garbage.
	Bicycles (including electric assisted bicycles)	Recyclables (metals)	Remove the batteries of electric assisted bicycles and then treat it as recyclables (dry batteries/mercury thermometers).
	Binders (made of plastic)	Combustible garbage	Take metal portions out as recyclables (metals).
	Binoculars	Combustible garbage	Metal items are recyclables (metals).
	Blackboards	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Items that can be broken down less than 50cm are combustible garbage.
	Blades of utility knives	Recyclables (metals)	Place inside a can with a lid.
	Blankets	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage. Electric blankets are small home appliances.
	Blinds (made of plastic)	Crushable garbage	Metal items are recyclables (metals). Anything longer than 1 m cannot be left at the collection site in its original state.
	Blinds (made of reed)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Items that can be cut down less than 50cm are combustible garbage.
	Blinds (made of wood/bamboo)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Items that can be broken down less than 50cm are combustible garbage.
	Blue sheet	Crushable garbage	Items less than 50 cm are combustible garbage. Fold into a small size and tie it with a string (1 m or less).
	Blu-Ray discs	Combustible garbage	
	Blu-Ray recorders (players)	Recyclables (small home appliances)	
	Body warmers (disposable type)	Combustible garbage	Activate and allow to cool before disposal.
	Bookends (made of metal)	Recyclables (metals)	Plastic items are combustible garbage.
	Books	Recyclables (papers)	Tie it crosswise with a string.
	Bookshelves	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Bottle openers (made of metal)	Recyclables (metals)	
	Bottles (cosmetic bottles)	Crushable garbage	
	Bottles (other than cosmetic bottles)	Recyclables (bottles)	Empty the content and roughly wash with water.

\* The information in this pamphlet applies only to domestic garbage. Garbage from business activities cannot be left in garbage collection site.

	Item	Sort category	Remarks
B	Bowling ball	Crushable garbage	Take measures to prevent it from rolling and always lable “ボーリングボール” (Bowling ball).
	Bowls	Crushable garbage	
	Bowls (for cooking) (made of metal)	Recyclables (metals)	Plastic items are combustible garbage.
	Boxes (made of wood/plastic)	Combustible garbage	Items more than 50 cm are crushable garbage. Anything longer than 1 m cannot be left at the collection site in its original state. Metal items are recyclables (metals). Paper items are recyclables (papers).
	Branch cutters	Recyclables (metals)	Wrap the blade in a material such as thick paper or cardboard and label “刃物危険” (Danger! Blade).
	Branches/Leaves	Combustible garbage	Leave for collection during the second half of the week. Large quantities of branches/leaves should be taken directly to the Yokkaichi Municipal Clean Center.
	Bricks	Crushable garbage	Put it in a sandbag. The quantity should be about 2 bags that can be held one-handed. In case of large quantity, please consult with Life Environment Section. Items disassembled by a vendor cannot be collected or processed.
	Broken glass pieces	Crushable garbage	Put it in the box so that it is not dangerous and label “ガラス危険” (Glass, Danger).
	Brooms	Crushable garbage	Items less than 50 cm are combustible garbage.
	Brushes (made of wood)	Combustible garbage	
	Buckets	Combustible garbage	Items more than 50 cm are crushable garbage. Metal items are recyclables (metals).
	Buckets (made of plastic)	Crushable garbage	Items less than 50 cm are combustible garbage. Metal items are recyclables (metals).
	Burner gas tables (stove burners)	Recyclables (metals)	Remove batteries.
	Business suits	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If excessively dirty, treat as combustible garbage (please indicate disposal).
	Button batteries	Recyclables (dry batteries/mercury thermometers)	Utilize the collection box placed in stores, etc. (insulate with vinyl tape or other suitable material.)
C	Cabinets (made of metal)	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Calculators	Recyclables (small home appliances)	Remove batteries if they are removable.
	Calendars	Recyclables (papers)	Tie it crosswise with a string.
	Cameras	Recyclables (small home appliances)	Remove batteries.

	Can openers (made of metal)	Recyclables (metals)	
	Candles	Combustible garbage	
	Cans (beverage cans)	Recyclables (beverage cans)	Empty contents and rinse with water.
	Cans (one-to cans)	Recyclables (metals)	Empty contents.
	Cans (other than beverage cans)	Recyclables (metals)	Empty the content and roughly rinse with water.
	Cans (spray cans)	Recyclables (spray cans)	Empty contents.
	Canteens (made of metal)	Recyclables (metals)	Plastic items are combustible garbage.
	Car wheels	Recyclables (metals)	Plastic wheel covers are crushable garbage.
	Carbon heaters	Recyclables (small home appliances)	
	Carbonic paper	Combustible garbage	
	Carpets	Crushable garbage	Tie it crosswise with a string and take them out.
	Cassette decks	Recyclables (small home appliances)	
	Cassette tapes	Combustible garbage	
	Cat litters (other than real sand)	Combustible garbage	
	Catalogs	Recyclables (papers)	Tie it crosswise with a string.
	CD radio cassette players	Recyclables (small home appliances)	
	CDs (including cases)	Combustible garbage	
	Cellophane tape	Combustible garbage	

	Item	Sort category	Remarks
C	Ceramic fan heaters	Recyclables (small home appliances)	
	Ceramics	Crushable garbage	
	Chains (made of metal)	Recyclables (metals)	Plastic items are combustible garbage.
	Chains for cars	Recyclables (metals)	Rubber and plastic items are crushable garbage.
	Chairs	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Chalk (for writing)	Combustible garbage	
	Charcoal	Combustible garbage	
	Chargers	Recyclables (small home appliances)	
	Chests	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Child seats	Crushable garbage	
	China	Crushable garbage	Put broken items in the box so that it is not dangerous and label “割れ物危険” (Broken Shards).
	Chopsticks	Combustible garbage	Metal items are recyclables (metals).
	Christmas trees	Combustible garbage	Electric lightings are recyclable (small home appliances).
	Cinema projectors	Recyclables (small home appliances)	
	Clay	Combustible garbage	
	Cleaning cloths	Combustible garbage	
	Clips (made of metal)	Recyclables (metals)	Place inside a can with a lid. Plastic items are combustible garbage.
	Clocks	Recyclables (small home appliances)	Remove batteries if they are removable.
	Cloth	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage.
	Clothes case (made of plastic)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Metal items are recyclables (metals).
	Clothes	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage.
	Clothes drier	Not collected and processed by city.	Items subject to Home Appliance Recycling LawFor details, refer to page 18 of the Guidebook for Garbage Disposal.
	Clothespins (made of plastic)	Combustible garbage	
	Coffee makers	Recyclables (small home appliances)	
	Colanders (made of plastic)	Combustible garbage	Metal items are recyclables (metals). Wood and bamboo are combustible garbage.
	Collars	Combustible garbage	Metal items are recyclables (metals).
	Composters	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Computer parts	Recyclables (small home appliances)	
	Concrete goods	Crushable garbage	Put it in a sandbag. The quantity should be about 2 bags that can be held one-handed. Items disassembled by a vendor cannot be collected or processed.
	Condoms	Combustible garbage	
	Confectionery bags (vinyl-coated)	Combustible garbage	
	Confectionery boxes	Recyclables (papers)	Flatten and tie it crosswise with a string.
	Confectionery cans	Recyclables (metals)	Empty contents.
	Contact lenses	Combustible garbage	
	Containers for fermented soybeans	Combustible garbage	
	Convection microwave ovens	Recyclables (small home appliances)	
	Cooking oil containers (made of plastic)	Combustible garbage	Empty contents. Metal items are recyclables (metals).
	Cooking paper	Combustible garbage	
	Cooking range hood filters (made of nonwoven fabric)	Combustible garbage	Filters with frames are crushable garbage.
	Cool wind machines	Recyclables (small home appliances)	
	Cooler boxes	Crushable garbage	
	Cooler boxes (made of wood)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.

\* The information in this pamphlet applies only to domestic garbage. Garbage from business activities cannot be left in garbage collection site.

	Item	Sort category	Remarks
C	Corks	Combustible garbage	
	Corrugated cardboard	Recyclables (papers)	Tie it crosswise with a string.
	Cosmetic bottles	Crushable garbage	
	Cosmetic compacts	Combustible garbage	
	Cosmetic containers (made of metal)	Recyclables (metals)	
	Cotton	Combustible garbage	
	Cotton blankets	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage.
	Cradles (wicker)	Combustible garbage	Items more than 50 cm are crushable garbage.
	Crayons	Combustible garbage	
	Cup noodles containers/top lids	Combustible garbage	
	Cupboards	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Cupboards (for tableware)	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Cups (made of glass)	Crushable garbage	Items other than those made of glass are combustible garbage.
	Curtain rails	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Curtains (including lace curtains)	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it's raining. If extremely dirty items are combustible garbage.
	Cushions	Combustible garbage	Items more than 50 cm are crushable garbage.
	Cut branches of garden trees	Combustible garbage	Make items less than 5cm thick have a length less than 50cm and put them out on a collection day during the second half of the week. Make items more than 5cm thick (less than 20cm thick) have a length less than 1m and put in crushable garbage. In case of large quantities, take it directly to the Yokkaichi Municipal Clean Center.
	Cut cotton	Combustible garbage	
	Cutlery	Recyclables (metals)	Wrap the blade in a material such as thick paper or cardboard and label “刃物危険” (Danger! Blade).
	Cutting boards for cooking	Combustible garbage	Items more than 50 cm are crushable garbage.
D	Dehumidifiers	Recyclables (small home appliances)	Anything longer than 1 m cannot be left at the collection site in its original state.
	Dehumidifying agents	Combustible garbage	Drain any collected water from the case.
	Dentures	Combustible garbage	
	Deodorizers	Combustible garbage	
	Desk mats	Combustible garbage	Items more than 50 cm are crushable garbage.
	Desks	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Detergent boxes	Combustible garbage	
	Dialysis packs and tubes (for home treatment)	Combustible garbage	
	Diaper covers	Combustible garbage	
	Diapers	Combustible garbage	Flush any waste down toilet.
	Diatomite bath mat	Crushable garbage	When putting it out at the collection site, be sure to protect the bag by double-packing it.
	Dictionaries	Recyclables (papers)	Tie it crosswise with a string.
	Digital audio players	Recyclables (small home appliances)	
	Dish dryers	Recyclables (small home appliances)	
	Dishwasher	Recyclables (small home appliances)	Items exchanged by vendors cannot be collected or processed.
	Displays (for PC)	Recyclables (small home appliances)	
	Displays for computers	Recyclables (small home appliances)	
	Disposable aluminum containers forhot-boiled noodles	Recyclables (metals)	Roughly wash with water.
	Disposable wooden chopsticks, their paper cases	Combustible garbage	
	Document files (made of paper)	Recyclables (papers)	Take metal portions out as recyclables (metals).

	Item	Sort category	Remarks
D	Document files (made of plastic)	Combustible garbage	Take metal portions out as recyclables (metals).
	Doll cases (made of glass)	Crushable garbage	Put it in the box so that it is not dangerous and label “ガラス危険” (Glass, Danger).
	Dolls (including Hina dolls/Gogatsudolls)	Combustible garbage	Metal parts are recyclables (metals).
	Doormats (made of chemical fibers)	Combustible garbage	
	Down quilts	Crushable garbage	Fold into a small size and tie it with a string (1 m or less).
	Drawing boards (made of wood)	Combustible garbage	Items more than 50 cm are crushable garbage.
	Drawing paper	Recyclables (papers)	Tie it crosswise with a string.
	Dress hangers (made of wire)	Recyclables (metals)	Plastic items are combustible garbage.
	Dressers (dressing tables)	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Dressing tables (dressers)	Bulk refuse specified items	Pay-for door-to-door collection for Bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Dry batteries	Recyclables (dry batteries/mercury thermometers)	Gather and place in transparent or semi-transparent bag and label “乾電池・水銀体温計” (dry batteries/mercury thermometers).
	Drying agents	Combustible garbage	
	Dumbbells (made of metal)	Recyclables (metals)	
	Dust box (made of plastic)	Crushable garbage	Items less than 50 cm are combustible garbage. Metal items are recyclables (metals).
	Dustpans (made of plastic)	Combustible garbage	Metal items are recyclables (metals).
	DVD recorders (players)	Recyclables (small home appliances)	
	DVD software (including cases)	Combustible garbage	
E	Ear picks	Combustible garbage	
	Earphones	Recyclables (small home appliances)	
	Earthen pots	Crushable garbage	
	Egg packages	Combustible garbage	
	Electones	Not collected by city	Ask the store where purchased to take the product back or take it to the Yokkaichi Municipal Clean Center.
	Electric blankets	Recyclables (small home appliances)	Label as "Electric Blanket".
	Electric cables/cords	Recyclables (metals)	Tie the items together. The AC adapter need not be removed.
	Electric carpets	Recyclables (small home appliances)	Fold into a small size and tie it with a string (1 m or less).
	Electric cooking plates	Recyclables (small home appliances)	
	Electric dictionary	Recyclables (small home appliances)	Remove batteries.
	Electric footwarmers	Recyclables (small home appliances)	
	Electric heaters	Recyclables (small home appliances)	
	Electric massage chairs	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Electric pots	Recyclables (small home appliances)	
	Electric shavers	Recyclables (small home appliances)	
	Electric tools (made of metal)	Recyclables (small home appliances)	
	Electric toothbrushes	Recyclables (small home appliances)	Remove batteries.
	Electronic cigarettes	Recyclables (small home appliances)	
	Enamel pots	Recyclables (metals)	
	Engine oils	Not collected and processed by city.	Please contact the place where you exchanged the oil, or the store where purchased, etc.
	Envelopes	Recyclables (papers)	Tie it crosswise with a string. The film of opening areas (such as in envelopes) is recyclable
	Erasers	Combustible garbage	
	Extension cords	Recyclables (metals)	Coil and tie with string.Power strips need not be removed.
	Extension stick	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state.
F	Fabric ropes	Combustible garbage	Cut into lengths of 50 cm or less.
	Facial massagers	Recyclables (small home appliances)	
	Fan heaters	Recyclables (small home appliances)	Be sure to remove kerosene.
	Fans	Recyclables (small home appliances)	

\* The information in this pamphlet applies only to domestic garbage. Garbage from business activities cannot be left in garbage collection site.

	Item	Sort category	Remarks
F	Felt-tip pens	Combustible garbage	
	Files (made of metal)	Recyclables (metals)	
	Films (negatives), film cases	Combustible garbage	
	Films of camera	Combustible garbage	
	Fire extinguishers	Not collected and processed by city.	Requests to pick up items at a specific window. For details, refer to page 21 of the Guidebook for Garbage Disposal.
	Firework sticks	Combustible garbage	Moisten with water.
	Fish bowls	Crushable garbage	Put broken items in the box so that it is not dangerous and label “ガラス危険” (Glass, Danger).
	Fish tanks	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Fishing lines	Combustible garbage	
	Fishing reels (made of metal)	Recyclables (metals)	
	Fishing rods	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Flashlights	Recyclables (small home appliances)	Remove batteries.
	Floor chairs (excluding furnishing/sofatypes)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Furniture and sofa-type items are subject to pay-for door-to-door collection for bulk refuse specified items. For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Floor cushions	Combustible garbage	Items more than 50 cm are crushable garbage. In case of multiple subjects, tie them crosswise with a string.
	Floor grates	Combustible garbage	Items more than 50 cm are crushable garbage. Anything longer than 1 m cannot be left at the collection site in its original state.
	Floppy disks	Combustible garbage	
	Fluorescent tubes	Recyclables (fluorescent tubes)	Including LEDs. Place in protective cover or other container so that they do not break.
	Folding bed	Bulk refuse specified items	Pay-for door-to-door collection for bulk refuse specified items For details, refer to page 19 of the Guidebook for Garbage Disposal.
	Folding fans (made of wood)	Combustible garbage	
	Food mixers	Recyclables (small home appliances)	
	Food trays (colored/patterned)	Combustible garbage	
	Food trays (white)	Combustible garbage	Use collection boxes such as those in supermarkets as much as possible.
	Foot-scrape mats (made of metal)	Recyclables (metals)	Plastic items are combustible garbage.
	Forks (made of metal)	Recyclables (metals)	Plastic/wood/bamboo items are combustible garbage.
	Fruits, fruit skins	Combustible garbage	Drain off the water sufficiently.
	Frying oil	Combustible garbage	Solidify it or soak it up in paper or rags.
	Frying pans	Recyclables (metals)	
	Frying-oil guard panels	Recyclables (metals)	
	Fusuma (sliding screens)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state.
	Futon covers	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it’s raining. If extremely dirty items are combustible garbage.
	Futon driers	Recyclables (small home appliances)	
	Futons	Crushable garbage	Fold into a small size and tie it with a string (1 m or less).
G	Galvanized sheets (made of metal)	Recyclables (metals)	Anything longer than 1 m cannot be left at the collection site in its original state. In case of large quantities, take it directly to the Yokkaichi Municipal Clean Center or Kusu Sanitation Center. Items disassembled by a vendor cannot be collected or processed.
	Galvanized sheets (made of plastic)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. In case of large quantities, take it directly to the Yokkaichi Municipal Clean Center or Kusu Sanitation Center. Items disassembled by a vendor cannot be collected or processed.
	Game machines	Recyclables (small home appliances)	Remove batteries.
	Game software	Combustible garbage	
	Garbage disposal machine	Recyclables (small home appliances)	Metal items are recyclables if most of the surface materials do not use electricity.
	Gardening props	Recyclables (metals)	Plastic items are crushable garbage.
	Gas cassettes (tabletop use)	Recyclables (spray cans)	Empty contents.
	Gas fan heaters	Recyclables (small home appliances)	

	Item	Sort category	Remarks
G	Gas mats (burner covers)	Recyclables (metals)	
	Gas ovens	Recyclables (metals)	
	Gas rice cookers	Recyclables (metals)	
	Gas stoves	Recyclables (metals)	
	Gauze	Combustible garbage	
	Glass doors (wooden frames)	Crushable garbage	Anything longer than 1 m cannot be left at the collection site in its original state. Those with a metal frame are recyclables (metals).
	Glass furnishings	Crushable garbage	Put broken items in the box so that it is not dangerous and label “ガラス危険” (Glass, Danger).
	Glass tableware	Crushable garbage	Put broken items in the box so that it is not dangerous and label “ガラス危険” (Glass, Danger).
	Glasses (made of metal)	Recyclables (metals)	
	Globes	Crushable garbage	Items less than 50 cm are combustible garbage.
	Gloves	Recyclables (cloth/clothing)	Gather together and place in transparent or semi-transparent bag. Do not leave at the collection site if it’s raining. If extremely dirty or vinyl items are combustible garbage.
	Gloves (made of leather)	Combustible garbage

Uh  
oh  
!

**If you see something,  
please provide information!!**

Some people who violate this ordinance behave intimidatingly and drive dangerously. Please ignore them and do not call them out. Contact us at the following place to provide the characteristics of the people involved. In addition, if the collection point is destroyed or you feel that you are in danger, please do not hesitate to contact a police station.

## People who violate this ordinance

can be  
fined up to **200,000** yen.

## Contact

**Life Environment Section, Yokkaichi Municipal  
Government (Yokkaichi-shi Kankyou Jigyou-ka)**

(Please tell us information such as the date, time, place or other information.)

**☎ 059-340-3308**

## Regarding cremation of animals

This is accepted at the Yokkaichi City Clean Center (back side).

Cremation fee [Cash payment]	Per dog.....	1,650 yen
	Per cat .....	1,100 yen
	Per other small animals ...	1,100 yen

**Reception hours** Monday to Saturday (including holidays)  
**08:30 – 12:00/13:00 – 16:30**

(The year-end and New Year holidays will be shown in the city bulletin and should be noted.)

\* Since animal cremations are done as joint cremations using a special cremation furnace, bones cannot be collected.
